MANNOL Marine 0950

1. SECTION IDENTIFICATION OF SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier: Motor Oil MANNOL Marine 0950

1.2 Relevant identified uses of the substance or mixture and uses advised against

Mannol Marine 0950 is high performance diesel engine oil developed for use on low sulphur distillate fuels in marine and industrial applications. They are formulated to have excellent resistance to oxidation and viscosity increase over a long period of service. They have superior water separating properties and provide excellent corrosion protection.

1.3 Details of the supplier of the safety data sheet: UAB "SCT Lubricants"

Adress: Šilutės pl. 119, 5800 Klaipėda, Lithuania

Telephone: +370 46 340345 E-mail: klaipeda@sct.lt Fax: (37046) 341891

1.4 Emergency telephone number: Adress: Šiltnamiu 29, LT-2043 Vilnius, telephone 8-5236 20 52 or

+370 687 53378 (All day)

2. SECTION HAZARD IDENTIFICATION

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) 1272/2008

This product is not meet the classification requirements of the current European legislation.

2.2 Label elements

Labeling according to Regulation (EC) 1272/2008

Not applicable

Suplemental label information

None

2.3 Other hazards

None indentified

The mixture does not contain any vPvB substance (vPvB = very persistent, very bioaccumulative) or is not included under XIII of the regulation (EC) 1272/2008

The mixture does not contain any PBT substance (PBT = persistent, bioaccumulative, toxic) or is not included under XIII of the regulation (EC) 1272/2008

3. SECTION | COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substance

Not applicable

3.2 Mixtures

Hazardous ingredients:

| EB Nr. | CAS Nr. | Reg. number | Name | Content % | Classification according to Regulation (EC) 1272/2008 (CLP) |
|---------------|-----------------|------------------|---|-------------|---|
| 272- 234-3 | - | 01-2119524004-56 | Phenol, dodecyl sulfurized, Carbonates, calcium salts, ovrbased | 0,5-1,14 % | Aquatic Chronic 4; H413 |
| 249- 109-7 | - | 01-2119953278-28 | Zinc bis (O,O-diisooctyl) bis (dithiophosphate) | 0,3-0,6 % | Skin. Irrit.2, H315 Eye Dam1,H318 Aquatic Chronic.2, H411 |
| 310- 154-3 | 121158- 58-5 | 01-2119513207-49 | Fenolis, dodecil-,-akotasis | 0,3-0,6 % | Repr.2, H361F; Skin. Irrit.2, H315 Eye Irrit.2, H319 Aquatic Acute.1, H400 Aquatic Chronic.1, H410 |
| 500- 209-1 | - | - | Nonylphenol Branched, ethoxylated | 0,05-0,11 % | Skin. Irrit.2, H315 Eye Irrit.2, H319 Aquatic Acute.1, H400 |

Page(s) 1 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

Prepared according to Commission Regulation (EC) No. 453/2010

| | | | | | Aquatic Chronic.1, H410 |
|-------|---|---|-----------------|-------------|-------------------------|
| | | | | | |
| | | | | | |
| 203- | - | - | Ethane-1,2-diol | 0,01-0,06 % | Acute Tox. 4, H302 |
| 473-3 | | | | | STOT Re 2; H373 |

It contains the following components that are not classified as dangerous according to Regulation (EC) 1272/2008: polymethacrylate, polyisobutene (viscosity modifier), the base oil (DMSO extract <3%, IP 346) and by viscosity the substance does not hazard by aspiration.

For the text of the R-phrases / H-phrases and classification codes (GHS/CLP), see Section 16.

4. SECTION | FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation

Remove person from danger area.

Supply person with fresh air and consult doctor according to symptoms.

If the person is unconscious, place in a stable side position and consult a doctor.

Skin contact

Wash with soap and water. Get medical attention if irritation develops.

Remove polluted, soaked clothing immediately, wash thoroughly with plenty of water and soap, in case of irritation of the skin (flare), consult a doctor.

Eye contact

Remove contact lenses.

Flush with water at least 30 minutes. Get medical attention if eye irritation develops or persists.

Swallowed

DO NOT INDUCE VOMITING. Get immediate medical attention.

Advice for first-aid providers

When providing first aid always protect yourself against exposure to chemicals or blood born diseases by wearing gloves, masks and eye protection. After

providing first aid wash your exposed skin with soap and water.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11

4.3 Indication of any immediate medical attention and special treatment needed

Note to physician: treat symptomatically

5. SECTION | FIRE-FIGHTING MEASURES

5.1 Extinguishing media

CO₂, dry chemical, or foam. Water can be used to cool and protect exposed material.

5.2 Special hazard arising from the substance or mixture

See section 10 for additional information.

5.3 Advice for firefighters

Recommend wearing self-contained breathing apparatus. Water may cause splattering.

6. SECTION | ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Personal protective equipment must be worn. Ventilate area if spilled in a confined space or other poorly ventilated area.

Page(s) 2 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

6.2 Environmental precautions

Prevent entry into sewers and waterways.

6.3 Methods and material for containment and cleaning up

Stop leak if possible without risk

Remove sources of ignition

Absorb in vermiculite, dry sand or earth and place into containers.

Collect spillage in containers, seal securely and deliver for disposal according to lical regulations

6.4 Reference to other section

See sections 8 and 13 for additional information.

7. SECTION | HANDLING AND STORAGE

7.1 Precautions for safe handling

Keep containers closed when not in use. Wash thoroughly after handling. Launder contaminated clothing before reuse. Empty container contains product residue

which may exhibit hazards of product. Dispose of packaging or containers in accordance with local, regional, national and international regulations.

Maximum Handling Temperature

70 °C, 158 °F

Maximum pumping temperature

Ambient

Maximum loading temperature

Not determined

7.2 Conditions for safe storage, including any incompatibilities

See section 10 for incompatible materials.

Maximum Storage Temperature

Not determined.

Max. Storage temperature

45 °C, 113 °F

7.3 Specific end use(s)

See section 1.2.

8. SECTION | EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

Workplace exposure limit (WEL) of the total hydrocarbon solvent content of the mixture (RCP method according to EH40): 300 mg/m³

| | Chemical Name | | Oil mist, minera | l | | | Content %: |
|---|---------------|-----------------|------------------|---------------|--------------|--------------------|------------|
|] | VEL- TWA: | 5 mg/m3 (ACGIH) | | WEL- STEL: | 10 mg/m3 (AC | GIH) | |
| I | BMGV: | | | | | Other information: | |

WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute reference period). | BMGV = Biological monitoring guidance value EH40. BGW = "Biologischer Grenzwert" (biological limit value, Germany) | Other information: Sen = Capable of causing occupational asthma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage.

Page(s) 3 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

Prepared according to Commission Regulation (EC) No. 453/2010

** = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the goal of revision.

| Distilates (petroleum), hydrotreated heavy paraffinic | | | | | | | | | |
|---|---|--------------------------|------------|-------|-------------------|-------|--|--|--|
| Area of application | Exposure route /Environmental compartment | Effect on health | Descriptor | Value | Unit | Notes | | | |
| Workers / employees | Human - inhalation | Long term, local effects | DNEL | 5,4 | mg/m3 | | | | |
| Consumer | Human - inhalation | Long term, systemic | DNEL | 1,2 | mg/m3 | | | | |
| | Environment – oral (animal feed) | | PNEC | 9.33 | mg/k g feed | | | | |

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction.

If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn. Applies only if maximum permissible exposure values are listed here.

8.2.2 Individual protection measures, such as personal protective equipment

General hygiene measures for the handling of chemicals are applicable. Wash hands before breaks and at end of work.

Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

Eye/face protection:

Tight fitting protective goggles with side protection (EN 166).

Skin protection - Hand protection:

Solvent resistant protective gloves (EN 374). If applicable

Protective nitrile gloves (EN 374) Minimum layer thickness in mm: 0,4

Permeation time (penetration time) in minutes: 480

Protective hand cream recommended.

The breakthrough times determined in accordance with EN 374 Part III were not obtained under practical conditions. The recommended maximum wearing time is 50% of breakthrough time.

Skin protection - Other:

Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments)

Respiratory protection: Normally not necessary.

If OES or MEL is exceeded.

Filter A2 P2 (EN 14387), code colour brown, white

Observe wearing time limitations for respiratory protection equipment.

Thermal hazards:

If applicable, these are included in the individual protective measures (eye/face protection, skin protection, respiratory protection).

Additional information on hand protection - No tests have been performed.

In the case of mixtures, the selection has been made according to the knowledge available and the information about the contents. Selection of materials derived from glove manufacturer's indications.

Page(s) 4 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account. Selection of a suitable glove depends not only on the material but also on other quality characteristics and varies from manufacturer to manufacturer.

In the case of mixtures, the resistance of glove materials cannot be predicted and must therefore be tested before use.

The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed.

8.2.3 Environmental exposure controls

No information available at present.

9. SECTION | PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Physical state: Liquid

Colour Yellow-Brownish
Odour Oil. Faint
Odour threshold Not determined
PH-value Not determined
Melting point/freezing point ~-12 °C
Initial boiling point and boiling range Not determined
Flash point, open cup (ASTM D-92) >216 °C

Evaporation rate Not determined Flammability (solid, gas) Not determined Lower explosive limit Not determined Upper explosive limit Not determined Vapour pressure: Not determined Vapour density (air = 1): Not determined Density: $\sim 0.894 \text{ g/ml} (15^{\circ}\text{C})$ Bulk density: Not determined Solubility(ies): Not determined

Water solubility:

Partition coefficient (n-octanol/water)

Auto-ignition temperature:

Decomposition temperature:

Viscosity (at 100°C)

Viscosity (at 40°C)

Explosive properties:

Not determined

Not determined

Not determined

Not determined

Not determined

When using product is not explosive.

development of explosive vapour/air mixture

possible

Oxidising properties: Not determined

9.2 Other information

Miscibility Not determined
Fat solubility / solvent Not determined
Conductivity Not determined
Surface tension Not determined
Solvents content Not determined

10. SECTION | STABILITY AND REACTIVITY

10.1 Reactivity

See also Subsection 10.2 to 10.6. The product has not been tested.

10.2 Chemical stability

Materiali s normally stable at moderately elevated temperatures and pressures.

10.3 Possibility of hazardous reactions

Will not occur.

Page(s) 5 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

10.4 Conditions to avoid

See also section 7.

Heating, open flame, ignition sources

Pressure increase will result in danger of bursting.

10.5 Incompatible materials

See also section 7.

Avoid contact with strong oxidizing agents, strong acids

10.6 Hazardous decomposition products

Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion.

No decomposition when used as directed

11. SECTION TOXICOLOGICAL INFORMATION

Acute Toxicity

Oral

The LD50 in rats is>10000 mg/kg. Based on data from components or similar materials

Derma

The LD50 in rabbits is >2000mg/kg. Based on data from components or similar materials

Inhalation

No data available to indicate product or components may be a toxic inhalation hazard.

Sin corrosion/irritation

Not expected to be a primary skin irritant. Based on data from components or similar materials. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, and cracking of the skin.

Serious eye damage/irritation

Not expected to cause eye irritation. Based on data from components or similar materials.

Respiratory irritation

If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract. Based on data from components or similar materials.

Respiratory or skin sensitization

Skin

No data available to indicate product or components may be a skin sensitizer

Respiratory

No data available to indicate product or components may be respiratory sensitizer.

Germ mutagenicity

No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

Carcinogenicity

This product contains mineral oils which are considered to be severely refined and not considered to be carcinogenic under IARC. All of the oils in this product

have been demonstrated to contain less than 3% extractables by the IP 346 test.

Reproductive Toxicity

No data available.

STOT repeated exposure

No data available to indicate product or components present at greater than 1% are chronic health hazards.

Other information

| Distilates (petroleum), hydrotreated heavy paraffinic | | | | | | | | |
|---|---------|-------|-------|----------|-------------|--------------|--|--|
| Toxicity/effect | Endpoin | Value | Unit | Organism | Test method | Notes | | |
| Acute toxicity, by oral route: | LD50 | >5000 | mg/kg | Rat | | | | |
| Acute toxicity, by dermal route: | LD50 | >5000 | mg/kg | Rabbit | | | | |
| Skin corrosion/irritation: | | | | | | Not irritant | | |
| Serious eye damage/irritation: | | | | | | Not irritant | | |

12. SECTION ECOLOGICAL INFORMATION

Possibly more information on environmental effects, see Section 2.1 (classification).

12.1 Toxicity

Toxicity to fish

No information available.

Toxicity to daphnia

Chronic effects expected at 1 - 10 mg/l. was based on data from similar materials.

Toxicity to algae

No information available.

Bacterias

No information available.

12.2 Persistence and degradability

Insoluble in water, not readily biodegradable

12.3 Bioccumulative potencial

No information available

12.4 Mobility in soil

No information available

12.5 Results of PBT and vPvB assessment

No information available

12.6 Other adverse effects

None known

13. SECTION DISPOSAL CONSIDERATIONS

13. 1 Waste treatment methods

For the substance/ mixture/residual amounts

Recover and reclaim or recycle, if practical. Do not allow runoff to sewer, waterway or ground. Confirm disposal procedures with environmental engineer and local regulations.

Contaminated packaging: Drums that are to be recycled must be thoroughly evacuated. Turn emty drum up side down, somewhat leaning (ca 10) with opening in lowest position. Let remaining products run out until drum is drip-free. Do not reseal without ventilating at a place free from ignition sourses. See section 7 for further instructions.

Code of waste EWC: 13 02 05

Waste engine, gear and lubricating oils-mineral-based non-chlorinated engine, gear and lubricating oils. Always check the given waste codes according to the actual conditions of manufacturing, formulation or use in your facilities.

For contaminated packing material

Pay attention to local and national official regulations Empty container completely.

Uncontaminated packaging can be recycled.

Dispose of packaging that cannot be cleaned in the same manner as the substance.

15 01 01 paper and cardboard packaging

15 01 02 plastic packaging

15 01 04 metallic packaging

ADR/RID not regulated ICAO not regulated not regulated not regulated

14.3 Hazard Class

ADR/RID not regulated ICAO not regulated not regulated not regulated

14.4 Packing Group

ADR/RID not regulated not regulated IMDG not regulated

14.5 Environmental hazard

ADR/RID not regulated ICAO not regulated not regulated not regulated

14.6 Special precautions for user

Review classification requirements before shipping materials at elevated temperatures.

14. 7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not determined

15. SECTION REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

UK Regulatory References

Health and safety at work Act. 1974

The Control of substances hazardous to health regulations 2002(S.I 2002 No.3677) with amendment EU Legislation

Dangerous substance Directive 67/548/EEC

Dangerous preparations Directive 1999/45/EC

Regulation (EC) No1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals(REACH), establishing a European Chemicals Agency, amending Directive1999/45/EC and tepealing Council Regulation (EEc) No 793/93 and Commission Regulation (EC) No 1488/94 as well as council Directive 76/769/EEc and Commission Directives 91/155/EEC, 93/105/EC and 2000/21/EC, including amendments.

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Derectives 67/548/EEC and 1999/45/EC, and amending Regulation(EC) No 1907/2006 with amendments.

15.2 Chemical safety assessment

No chemical safety assessment has been carried out

Page(s) 8 of 11 Version: 1.0 Effective date: 2015 05 28 Print date: 2016.02.24

MANNOL Marine 0950

16. SECTION OTHER INFORMATION

The following phrases represent the posted H phrases, Hazard Class and Risk Category Code (GHS/CLP) of the product and the constituents (specified in Section 2 and 3).

Relevant hazard phrases

H413-may cause long lasting harmful effects to aquatic life

H315 - Causes skin irritation.

H318-risk of serious damage to eyes

H411- toxic to aquatic life with long lasting effects.

H361f-possible risk of impaired fertility or possible risk of harm to the unborn.

H410 - Very toxic to aquatic life with long lasting effects.

H319 - Causes serious eye irritation.

H302- harmful if swallowed

H373-may cause damage to organs through prolonged or repeated exposure.

Asp. Tox. — Aspiration hazard

STOT SE — Specific target organ toxicity - single exposure - narcotic effects

Aquatic Chronic — Hazardous to the aquatic environment - chronic

Eye Dam.-serious eye damage

Skin Irrit.-Skin Irritation

Aquatic Acute- Hazardous to the aquatic environment-acute
